

1. Record Nr.	UNINA9910254508403321
Autore	Ring Johannes
Titolo	Atopic Dermatitis : Eczema / / by Johannes Ring
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-22243-0
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (241 p.)
Disciplina	610
Soggetti	Dermatology Allergy Allergology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	General Introduction -- Epidemiology of Atopic Eczema -- Clinical Symptoms of Atopic Eczema in its Different Stages -- Pathophysiology of Atopic Eczema -- Management of Patients with Atopic Eczema -- Special Therapeutic Options and Pharmacologic Substances in the Treatment of Atopic Eczema -- Prevention -- Summary: "How to Live with Atopic Eczema".
Sommario/riassunto	This book presents the state of the art in research into atopic dermatitis, or atopic eczema, and provides numerous effective practical management recommendations that are grounded in the immense clinical experience of the author. A scientific evidence-based approach to the subject is adopted, progressing from clinical symptoms in different disease stages, molecular genetics, and pathophysiology through to treatment and prevention. All aspects of patient management are covered, including diagnostics, avoidance strategies, emollient therapy, and acute treatment of eczema and itch. Diverse special therapeutic approaches are discussed, ranging from glucocorticoids, topical calcineurin inhibitors, and antimicrobial therapy through to UV therapy, allergen-specific immunotherapy, systemic immunosuppressive therapy, and emerging options. Environmental influences are considered, and there is a focus on the whole human being, with attention to psychosocial aspects of the disease and the benefit of educational programs such as "eczema schools". Atopic

Dermatitis will be invaluable for dermatologists, allergists, pediatricians, and general practitioners and informative for other interested persons and sufferers. .
