

1. Record Nr.	UNINA9910254509803321
Titolo	Oncological PET/CT with Histological Confirmation [[electronic resource] /] / edited by Juliano Cerci, Stefano Fanti, Dominique Delbeke
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-27880-0
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (100 p.)
Disciplina	610
Soggetti	Nuclear medicine Oncology Pathology Nuclear Medicine Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	PART I. Biopsy guided PET/CT: Principle of biopsy guided imaging. - FDG PET/CT to guide biopsy: methods.- FDG PET/CT to guide biopsy: type of access.- PART II. FDG PET/CT in lymphoma: Need of biopsy in lymphoma.- FDG PET/CT to guide biopsy in lymphoma: results.- PART III. FDG PET/CT in pancreatic lesions:Need of biopsy in pancreatic lesions.- FDG PET/CT to guide biopsy in pancreatic lesions: results. - PART IV. FDG PEM in breast lesions: Need of biopsy in breast lesions. - FDG PEM to guide biopsy in breast lesions: results -- PART V. PET/CT and CNS malignancies: Need of biopsy in CNS malignancies -- FDG PET/CT to guide biopsy in CNS: results -- PART VI. PET/CT and prostate cancer -- Choline PET/CT to guide biopsy in prostate cancer diagnosis -- PART VII. FLT PET/CT in cancer diagnosis: FLT PET/CT in cancer diagnosis: results.
Sommario/riassunto	This book reviews the important new field of PET/CT-guided biopsy, which is of potential value in optimizing the diagnostic yield of biopsies. The role of this technology is examined in a range of malignancies, including lymphoma, pancreatic, breast cancer and CNS malignancies. True positive and false positive cases are presented and

discussed, and many aspects of PET and pathology are addressed. The book describes many case presentations illustrated with mostly 18F-FDG PET/CT images, but also other PET radiopharmaceuticals such as 18F-FLT. The three editors are expert nuclear medicine physicians from Europe and North and South America, and the range of experiences gained in using PET/CT across the globe is reflected in the book.
