Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (198 p.)
Disciplina	617.6
Soggetti	Dentistry Mouth - Surgery Oral and Maxillofacial Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Intra-Oral Examination, Referral and Biops.- Oral Mucosa and Soft Tissues -- The Lips -- The Tongue -- The Gingiva and the Alveolar Mucosa -- The Palate -- The Jaw Bones.
Sommario/riassunto	This atlas is designed to assist all who are involved in diagnosing and treating oral diseases. Individual chapters focus on lesions and disorders of the oral mucosa, soft tissues (including the minor salivary glands), lips, tongue, gingiva, palate, and jaw bones (odontogenic and non-odontogenic lesions). In addition to the more common diseases, less frequent disorders are also covered, some of which have been recognized only in recent years. Throughout, the approach is practice oriented, with concise text and an abundance of high-quality clinical, radiographic, and, where appropriate, histopathologic images. The combined training of the author in oral surgery and oral pathology means that he has exceptional expertise in both the diagnosis and the treatment of oral diseases. His detailed knowledge and experience are fully reflected in the Atlas of Oral Diseases, which will be very helpful for dental and medical professionals in their daily practice.
