

1. Record Nr.	UNINA9910254523803321
Titolo	Pediatric Atlas of Ultrasound- and Nerve Stimulation-Guided Regional Anesthesia [[electronic resource] /] / edited by Ban C.H. Tsui, Santhanam Suresh
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2016
ISBN	0-387-79964-8
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (556 p.)
Disciplina	610
Soggetti	Anesthesiology Radiology Pediatrics Pain medicine Surgery Ultrasound Imaging / Radiology Pain Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	3.8.5 Power Doppler
Sommario/riassunto	This is the first comprehensive text-atlas that shows how to use ultrasound technology and nerve stimulation techniques to guide regional blockade in children. Clinical chapters follow a sequential, highly illustrated format that provides step-by-step guidance and include cases, clinical pearls, and troubleshooting tips. Nearly 400 figures, consisting of ultrasound images, MRI images, and schematics, have been assembled to maximize understanding of pediatric neuroanatomy and its relationship to surrounding anatomical structures. To help the novice user, the book features side-by-side presentation of unlabeled and labeled ultrasound images. Pediatric Atlas of Ultrasound- and Nerve Stimulation-Guided Regional Anesthesia focuses on common approaches, supplemented in clinical pearls and notes by alternative approaches, and emphasizes dynamic

and systematic scanning techniques. It is intended for pediatric anesthesiologists who wish to incorporate regional blockade into their repertoire and designed as a refresher and resource for all regional anesthesiologists seeking to refine their skills. Unique Selling Points: Internationally renowned experts Presents two technologies proven to improve block success when used together Superb coverage of pediatric anatomy in relation to regional anesthesia Equipment, set-up, pain assessment, local anesthetic pharmacology, and patient safety considerations for child patients.
