

1. Record Nr.	UNINA9910254528303321
Titolo	Clinical Handbook of Cardiac Electrophysiology // edited by Benedict M. Glover, Pedro Brugada
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-40818-6
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (280 p.)
Disciplina	610
Soggetti	Cardiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Cardiac Anatomy and Electrophysiology -- Cardiac EP Study, Maneuvers and Ablation -- Electroanatomic Mapping AV Nodal Re-Entry Tachycardia (AVNRT) -- Accessory Pathway Conduction -- Atrial Tachycardia -- Atrial Flutter -- Atrial Fibrillation -- Ventricular Tachycardia -- Anti-Arrhythmic Drugs.
Sommario/riassunto	This handbook provides a logical and practical approach to cardiac arrhythmia management. This subject has evolved as one of the most rapidly expanding fields within medicine and it is therefore critical to understand the basic principles of arrhythmia mechanisms in order to assist with diagnosis and choosing effective treatment strategies. Each of the essential aspects of cardiac electrophysiology is covered within the text, presented in an easy-to-use format. For each arrhythmia the etiology, classification, clinical presentation, mechanism, electrophysiology set up, and trouble-shooting procedures are presented and demonstrated using illustrations, fluoroscopy images, ECGs, and endocavity electrograms. Clinical Handbook of Cardiac Electrophysiology is a widely useful resource that aims to promote this important sub-specialty. It is a valuable reference for cardiac electrophysiologists, fellows and practising cardiologists, family practitioners, cardiology trainees, students, allied professionals, and nurses. .
