

1. Record Nr.	UNINA9910254539203321
Autore	Virdis Agostino
Titolo	Hypertension and Comorbidities // by Agostino Virdis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer , , 2016
ISBN	3-319-39164-X
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (XVIII, 156 p. 25 illus., 7 illus. in color.)
Collana	Practical Case Studies in Hypertension Management , 2364-6632
Disciplina	616.13206
Soggetti	Cardiology Nephrology Endocrinology Diabetes Neurology Geriatrics Endocrinology Neurology Geriatrics/Gerontology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Clinical case 1: Adult Patient with Hypertension and Systolic Dysfunction -- Clinical case 2: Adult Patient with Hypertension and Myocardial Infarction -- Clinical case 3: Adult Patient with Hypertension and Diabetes Mellitus -- Clinical case 4: Adult Patient with Hypertension and End-stage renal disease -- Clinical case 5: Adult Patient with Hypertension and Congestive Heart Failure -- Clinical case 6: Adult Patient with Hypertension and Atrial Fibrillation -- Clinical case 7: Adult Patient with Hypertension and Obesity -- Clinical case 8: Adult Patient with Hypertension and Previous Stroke.
Sommario/riassunto	This guide is structured to assist physicians in the management of those hypertensive patients who present with specific comorbidities, such as diabetes, systolic dysfunction, obesity, renal disease, or previous cardiac events, often associated with hypertension. The clinical cases contained in this book have been selected to provide a

paradigmatic set of scenarios frequently encountered in daily clinical practice, and will serve as an easy-to-access tool in applying general guidelines to individual patients, particularly in the choice of the most appropriate antihypertensive therapy. Treatment of hypertension with associated clinical conditions require specific therapies and combinations of drugs, which are necessarily different from one comorbidity to another. By discussing exemplary cases that may better represent clinical practice in a “real world” setting, and analyzing step by step the diagnostic and therapeutic process, this book will assist cardiologists and physicians in selecting the diagnostic tools and forms of treatment best suited to the individual patient and the particular cardiovascular risk profile.
