Nota di contenuto	Introduction -- Theoretical Considerations -- Methodology and Data -- Determinants of Board Composition -- Corporate Governance Mechanisms and Firm Performance -- Corporate Governance Mechanisms and Firm-Risk Taking -- Conclusions. .
Sommario/riassunto	This book examines the nature of the marketization of corporate boards following the introduction of the split share reform, corporate board and shareholder relations, corporate performance, and risk-taking conduct in China. The chapters cover topics such as determinants of corporate board size and independence, corporate risk-taking conduct under different controlling shareholder types. The book deepens our understanding of corporate governance mechanisms as most previous studies have limited their findings using mainstream perspectives grounded on neoclassical theory. It outlines that China's corporate board composition is determined by the board's scope of

operation, monitoring, bargaining power, and other governance mechanisms and regulations. It also offers a comparison between China's experience with other economies in general and other transition economies in particular. As such, the book represents an essential overview of the current concerns regarding corporate governance in China. It is of great interest to legal researchers, policymakers, and legal practitioners working with business investments in China.

WELL-DIFFERENTIATED THYROID CANCER FOLLICULAR CARCINOMA -- 70 Follicular Thyroid Carcinoma -- 71 Surgical Management of Follicular Cancer -- 72 Pathology of Follicular Cancer -- 73 Hürthle Cell Carcinoma -- 74 Follow-Up Strategy in Follicular Thyroid Cancer -- 75 Radionuclide Imaging and 131I Therapy in Follicular Thyroid Carcinoma -- 76 PET/CT in Follicular Cancer Including Hürthle Cell Cancer -- 77 Follicular Thyroid Cancer: Special Aspects in Children and Adolescents -- 78 External Radiation Therapy of Follicular Carcinoma -- 79 Determinants of Prognosis of Follicular Thyroid Carcinoma -- PART VI. VARIANTS OF THYROID CANCER.- 80 Aggressive Variants of Papillary Thyroid Carcinoma and Poorly Differentiated Carcinoma -- 81 Miscellaneous and Unusual Tumors of the Thyroid Gland -- 82 Pathology of Miscellaneous and Unusual Tumors of the Thyroid Gland -- PART VII. UNDIFFERENTIATED TUMORS: MEDULLARY THYROID CARCINOMA -- 83 Clinical Aspects of Medullary Thyroid Carcinoma -- 84 Cytology and Pathology of Medullary Carcinoma -- 85 Medullary Carcinoma of the Thyroid: Surgical Management -- 86 Radionuclide Imaging of Medullary Carcinoma -- 87 PET/CT in Medullary Thyroid Cancer -- 88 Radiation Therapy in Medullary Cancer -- 89 Medullary Carcinoma of the Thyroid: Chemotherapy -- 90 A Comparison of the ATA, NCCN, ETA, and BTA Guidelines for the Management of Medullary Thyroid Cancer -- PART VIII. UNDIFFERENTIATED TUMORS: THYROID LYMPHOMA -- 91 Thyroid Lymphoma -- 92 Pathology of Lymphoma of the Thyroid -- 93 PET/CT in Lymphoma and Lymphoma of the Thyroid -- PART IX. UNDIFFERENTIATED TUMORS: ANAPLASTIC THYROID CANCER -- 94 Anaplastic Thyroid Carcinoma: Clinical Aspects -- 95 Surgical Management of Anaplastic Thyroid Carcinoma -- 96 Pathology of Anaplastic Carcinoma -- 97 PET/CT in Anaplastic Cancer of the Thyroid -- 98 Anaplastic Thyroid Cancer -- 99 Chemotherapy for Anaplastic Thyroid Cancer -- 100 Anaplastic Thyroid Carcinoma: Prognosis -- PART X. NEW FRONTIERS AND FUTURE DIRECTIONS -- 101 Advances in Radiation Therapy -- 102 New Approaches in Nuclear Medicine for Thyroid Cancer -- 103 124I in Differentiated Thyroid Cancer -- 104 Future Directions for Advanced Thyroid Cancer Therapy -- 105 Potential Approaches to Chemotherapy of Thyroid Cancer in the Future -- PART XI. Additional Resources.- 106 Prophylaxis against Radiation Exposure from Radioiodine -- 107 Low Iodine Diets -- 108 Appendix A: Books and Manuals -- 109 Appendix B: Additional Sources of Information: Support groups, Websites and additional information -- 110 Appendix C: Forms and Instructions for Patients Treated with Radioactivity.

Sommario/riassunto

Thoroughly revised and extensively expanded, this encyclopedic, highly acclaimed title addresses all aspects of the etiology, pathogenesis, diagnosis, initial treatment and long-term management of all varieties of thyroid cancer. Expertly edited by Drs. Leonard Wartofsky and Douglas Van Nostrand, this gold standard reference is divided into 11 Parts: General Considerations on Thyroid Cancer; General Considerations on Nuclear Medicine; the Thyroid Nodule; Well-Differentiated Thyroid Cancer; Variants of Thyroid Cancer, Undifferentiated Tumors: Medullary Thyroid Carcinoma; Undifferentiated Tumors: Thyroid Lymphoma; Undifferentiated Tumors: Anaplastic Thyroid Cancer; New Frontiers and Future Directions; and Additional Resources. With exceptional breadth and depth, the book includes chapters dedicated to isotopes, isotope uptake and scanning

procedures such as SPECT/CT, radioiodine ablation (with or without recombinant human TSH), stunning, dosimetry (with or without recombinant human TSH), Octreotide and FDG-PET scanning and other alternative imaging modalities. There is a valuable reference atlas of scan images and illustrations, and a scholarly summary of the side effects of radioiodine and how to avoid or minimize adverse effects of treatment. In addition to an updated section on ultrasonography of the thyroid gland, new sections have been added, including ones on ultrasonography of cervical lymph nodes and imaging for thyroid cancer employing computerized tomography (CT), positron emission tomography (PET) and magnetic resonance imaging (MRI). An indispensable reference source with chapters written by the field's leading authoritative experts, *Thyroid Cancer: A Comprehensive Guide to Clinical Management, Third Edition*, will be of great interest to not only pathologists, endocrine surgeons, endocrinologists, nuclear medicine physicians, and oncologists but all clinicians with an interest in thyroid cancer.
