Sommario/riassunto	Learn how to build playgrounds so you can test your code, syntax, and ideas quickly. You can even learn from playgrounds built by others or build playgrounds to teach. And the playgrounds you build and use on your Mac and on your iPad are automatically shared using your Apple ID. Exploring Swift Playgrounds shows you how to use playgrounds to try out your basic app design ideas to see what they look like and how they behave. It doesn't matter if you can't remember a pesky little bit of syntax. Rather than look it up, you can try it out in a playground. More and more of the APIs are now available through playgrounds, so that you can do more than ever before. Going beyond print, the Swift Playgrounds book tool allows for immersive experiences for users learning code, organization processes, and anything else that can be

described in the rich (and free) authoring tools provided by Apple. All of which you can learn how to use in Exploring Swift Playgrounds.

Sommario/riassunto	<p>Adolescence is a time of major transition, however, health care services in the United States today are not designed to help young people develop healthy routines, behaviors, and relationships that they can carry into their adult lives. While most adolescents at this stage of life are thriving, many of them have difficulty gaining access to necessary services; others engage in risky behaviors that can jeopardize their health during these formative years and also contribute to poor health outcomes in adulthood. Missed opportunities for disease prevention and health promotion are two major problematic features of our nation's health services system for adolescents. Recognizing that health care providers play an important role in fostering healthy behaviors among adolescents, Adolescent Health Services examines the health status of adolescents and reviews the separate and uncoordinated programs and services delivered in multiple public and private health care settings. The book provides guidance to administrators in public and private health care agencies, health care workers, guidance counselors, parents, school administrators, and policy makers on investing in, strengthening, and improving an integrated health system for adolescents.</p>
