

1. Record Nr.	UNINA9910254615303321
Autore	Burgess Colin <1947->
Titolo	Interkosmos : The Eastern Bloc's Early Space Program // by Colin Burgess, Bert Vis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-24163-X
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (335 p.)
Collana	Space Exploration
Disciplina	500
Soggetti	Astronomy Aerospace engineering Astronautics Space sciences History Popular Science in Astronomy Aerospace Technology and Astronautics Space Sciences (including Extraterrestrial Physics, Space Exploration and Astronautics) History of Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	History and Development of the Interkosmos program -- First to fly: Czechoslovakia's cosmonaut -- From Poland to Salyut-6 -- Sigmund Jähn and Soyuz-30 -- Bulgaria in space -- Hungary joins the space club. - A Vietnamese cosmonaut. - The Soviet Cuban Salyut mission -- From the steppes of Mongolia. - Romania continues the program -- Beyond Interkosmos. - Soviet-Indian mission. -- A Syrian researcher on Mir. -- Bulgaria's second flight. -- Afghanistan's cosmonaut-researcher. -- Chrétien in space again. -- The Interkosmos program. -- Appendices. -- About the authors. -- Index.
Sommario/riassunto	This book focuses on the Interkosmos program, which was formed in 1967, marking a fundamentally new era of cooperation by socialist countries, led by the Soviet Union, in the study and exploration of

space. The chapters shed light on the space program that was at that time a prime outlet for the Soviet Union's aims at becoming a world power. Interkosmos was a highly publicized Russian space program that rapidly became a significant propaganda tool for the Soviet Union in the waning years of communism. Billed as an international "research-cosmonaut" imperative, it was also a high-profile means of displaying solidarity with the nine participating Eastern bloc countries. Those countries contributed pilots who were trained in Moscow for week-long "guest" missions on orbiting Salyut stations. They did a little subsidiary science and were permitted only the most basic mechanical maneuvers. In this enthralling new book, and following extensive international research, the authors fully explore the background, accomplishments and political legacy of the Interkosmos program. Through personal and often highly revealing interviews with many of the participants they relate the very human story behind this extraordinary but controversial space venture.
