

1.	Record Nr.	UNIORUON00046283
	Autore	IAWORSKIJ, I. L.
	Titolo	Reise der russischen Gesandtschaft in Afghanistan und Buchara in den Jahren 1878-1879 / von I.L. laworskij ; aus dem Russischen übersetzt und mit einem Vorwort und Anmerkungen von Ed. Petri
	Pubbl/distr/stampa	Jena, : Hermann Costenoble, 1885
	Descrizione fisica	2 v. ; 23 cm
	Classificazione	AFG VIII B
	Soggetti	VIAGGI - AFGHANISTAN
	Lingua di pubblicazione	Tedesco
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910254621403321
	Autore	Miyamoto Kenro
	Titolo	Plasma Physics for Controlled Fusion / / by Kenro Miyamoto
	Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2016
	ISBN	3-662-49781-6
	Edizione	[2nd ed. 2016.]
	Descrizione fisica	1 online resource (XII, 495 p. 158 illus.)
	Collana	Springer Series on Atomic, Optical, and Plasma Physics, , 1615-5653 ; ; 92
	Disciplina	530.44
	Soggetti	Atoms Physics Nuclear fusion Nuclear energy Plasma (Ionized gases) Nuclear physics Heavy ions Fluids Atoms and Molecules in Strong Fields, Laser Matter Interaction Nuclear Fusion Nuclear Energy Plasma Physics Nuclear Physics, Heavy Ions, Hadrons Fluid- and Aerodynamics

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Nature of Plasma -- Orbit of Charged Particles in Various Magnetic Configurations -- Magnetohydrodynamics -- Equilibrium -- Confinement -- Magnetohydrodynamic Instabilities -- Resistive Instability -- Boltzmann's Equation -- Waves in Cold Plasmas -- Wave Heating and Current Drive -- Instabilities Driven by Energetic Particles -- Plasma Transport by Turbulence -- Development of Fusion Researches -- Tokamak -- Reversed Field Pinch -- Stellarator -- Open End System -- Inertial Confinement.
Sommario/riassunto	<p>This new edition presents the essential theoretical and analytical methods needed to understand the recent fusion research of tokamak and alternate approaches. The author describes magnetohydrodynamic and kinetic theories of cold and hot plasmas in detail. The book covers new important topics for fusion studies such as plasma transport by drift turbulence, which depend on the magnetic configuration and zonal flows. These are universal phenomena of microturbulence. They can modify the onset criterion for turbulent transport, instabilities driven by energetic particles as well as alpha particle generation and typical plasma models for computer simulation. The fusion research of tokamaks with various new versions of H modes are explained. The design concept of ITER, the international tokamak experimental reactor, is described for inductively driven operations as well as steady-state operations using non-inductive drives. Alternative approaches of reversed-field pinch and its relaxation process, stellarator including quasi-symmetric system, open-end system of tandem mirror and inertial confinement are also explained. Newly added and updated topics in this second edition include zonal flows, various versions of H modes, and steady-state operations of tokamak, the design concept of ITER, the relaxation process of RFP, quasi-symmetric stellarator, and tandem mirror. The book addresses graduate students and researchers in the field of controlled fusion. .</p>
