

1. Record Nr.	UNINA9910254655303321
Autore	Phung Thuy L
Titolo	Pediatric Dermatopathology // by Thuy L. Phung, Teresa S. Wright, Crystal Y. Pourciau, Bruce R. Smoller
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-44824-2
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XLI, 622 p. 914 illus., 381 illus. in color.)
Disciplina	616.07
Soggetti	Pathology Dermatology Surgical oncology Surgical Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Preface -- Genodermatoses -- Spongiotic (eczematous) dermatoses -- Vesicular and bullous dermatoses -- Papulosquamous diseases -- Interface dermatoses -- Dermatoses with minimal epidermal changes -- Granulomatous diseases -- Connective tissue diseases. - Vasculitides, vasculopathies and neutrophilic infiltrates -- Panniculitis -- Inflammatory disorders of the cutaneous appendages -- Bacterial and protozoal diseases of the skin -- Viral and rickettsial diseases of the skin -- Fungal infestations -- Insect bites and infestations -- Nutritional disorders -- Deposition disorders -- Disorders of pigmentation -- Diseases of the nails and hair -- Iatrogenic dermatologic conditions -- Melanocytic proliferations and other pigmented lesions -- Vascular anomalies and proliferations -- Hematopoietic proliferations -- Keratinocytic cysts, proliferations and neoplasms -- Fibrous proliferations -- Neural proliferations -- Adipocyte proliferations -- Smooth muscle, cartilage, bone proliferations -- Benign hamartomatous proliferations -- Cutaneous metastases. .
Sommario/riassunto	This book provides practicing pathologists, dermatologists, cutaneous oncologists and dermatopathologists with a reference textbook that reviews the clinical and histopathologic features of skin disorders that

affect children, along with a discussion of the molecular pathogenesis for each disease as it is currently known. The book includes a concise discussion of the clinical presentation, as well as the histologic and, when appropriate, immunohistochemical features of each disease. The book is divided into two main sections, non-neoplastic and neoplastic skin diseases. Each section is comprised of a series of chapters organized according to histologic findings rather than by clinical classification systems. This will enable the practicing pathologist to browse chapters based upon observation of routine histologic patterns. Each chapter addresses the differential diagnoses of skin disorders with focus on salient histologic characteristics. The text is richly illustrated with over 1000 colorful clinical and histologic photographs for each of the 400 entities discussed. Pediatric Dermatopathology provides a microscope table reference for the practicing pediatric pathologist, general pathologist and dermatopathologist. Further, it will serve as a reference volume for dermatologists, pediatricians and oncologic surgeons.
