Henshaw Pubbl/distr/stampa Cham:,: Springer International Publishing:,: Imprint: Springer,, 2017 **ISBN** 3-319-43121-8 Edizione [1st ed. 2017.] Descrizione fisica 1 online resource (XIII, 586 p. 179 illus., 132 illus. in color.) 616.994 Disciplina Soggetti Oncology Surgery Radiotherapy Oncology Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Nota di bibliografia Includes bibliographical references at the end of each chapters. Introduction -- Pathology and Biology -- The Diagnostic Workup --Nota di contenuto Multidisciplinary Teams -- Multidisciplinary Approach to Adult Sarcomas -- Multidisciplinary Approach to Pediatric Sarcomas --Metastatic Disease/Salvage Therapy -- Novel Targets and Investigational Agents. The purpose of this book is to define and demonstrate how a Sommario/riassunto multidisciplinary team can be organized, integrated, and utilized in the care of sarcoma patients. Real world experiences related by multiple sarcoma specialists working as members of a multidisciplinary team along with specific case examples highlighting sarcomas of bone and soft tissue in children and adults are presented in a framework geared toward practicing oncologists and surgeons in order to foster the creation and development of care teams for sarcoma patients. It is explained how a truly multidisciplinary approach, with "one stop shopping," offers better standardization and delivery of care, streamlines patient education, facilitates discussions and decision making, and provides comprehensive support throughout the treatment process. All aspects of treatment are covered, from first-line

> treatments for different tumor types through to salvage therapy and the development of novel investigational agents. This book will be of

benefit to all members of the medical community who have a role to play in the care of these complex patients, including therapists, nurses, mid-level practitioners, primary care doctors, and subspecialists. .
