Sommario/riassunto	This book reinterprets the Leveller authorships of John Lilburne, Richard Overton, and William Walwyn and foregrounds the role of ordinary people in petitioning and protest during an era of civil war and revolution. The Levellers sought to restructure the state in 1647-49 around popular consent and liberty for conscience, especially in their Agreement of the People. Their following was not a 'movement' but

largely a political response of the sects that had emerged in London's rapidly growing peripheral neighbourhoods and in other localities in the 1640s. This study argues that the Levellers did not emerge as a separate political faction before October 1647, that they did not succeed in establishing extensive political organisation, and that the troop revolt of spring 1649 was not really a Leveller phenomenon. Addressing the contested interpretations of the Levellers throughout, this book also introduces Leveller history to non-specialist readers.
