

1. Record Nr.	UNINA9910254795303321
Autore	Murphy John W.
Titolo	Narrative Medicine and Community-Based Health Care and Planning / / by John W Murphy, Berkeley A. Franz, Jung Min Choi, Karen A. Callaghan
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-61857-1
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (IX, 136 p.)
Disciplina	616.89
Soggetti	Clinical health psychology Social service Rehabilitation Social medicine Health Psychology Social Work and Community Development Medical Sociology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Introduction -- Community and narratives -- Care and dialogue -- Storylines, causality, and illness -- Apprehending storylines -- Mapping and intervention -- Politics of storytelling -- Conclusion.
Sommario/riassunto	This progressive resource brings the innovative power of narrative medicine to the forefront of community public health care. Chapters describe community involvement across a continuum of control, from health consultants describing problems and suggesting solutions to health committees designing programs and evaluating results. Narrative strategies to this end, including authentic dialogue and community mapping, are examined in the context of public health and fleshed out with examples of different levels of participation by community members. From the respectful collaboration modeled here, the principles of community public health care can potentially expand beyond the immediate community into other social domains on a greater scale. Included in the coverage: Narratives, local knowledge, and world entry. Community and narratives. What is dialogue?

Storylines, causes, and locus of interventions. Community mapping tells a story. The politics of storytelling. Narrative Medicine and Community-Based Health Care and Planning gives health psychologists, sociologists, social workers, and public health administrators realistic practical insights for tapping into the unique resources communities and clients have to offer. This is the next step in the evolution of public health, toward large-scale improvements in care delivery, access to and relevance of services, and patient and community outcomes.
