Nota di contenuto	Introduction -- School bullying in different countries: Prevalence, Risk Factors and Short-Term Outcomes -- Personal protective factors against Bullying: Emotional, Social, and Moral Competencies -- Contextual protective factors against bullying: School-Wide climate -- Protecting children through anti-bullying interventions -- Protecting bullies and victims from long-term undesirable outcomes -- Conclusion.
Sommario/riassunto	This compact resource synthesizes current research on bullying in the schools while presenting strengths-based approaches to curbing this growing epidemic. Its international review of cross-sectional and longitudinal studies unravels the complex dynamics of bullying and provides depth on the range of negative outcomes for bullies, victims, enablers, and victims who bully. Chapters on protective factors against bullying identify personal competencies, such as empathy development, and keys to a positive school environment, featuring findings on successful school-based prevention programs in different countries. Throughout, the authors clearly define bullying as a public health/mental health issue, and prevention as a deterrent for future antisocial and criminal behavior. Included in the coverage: · School bullying in different countries: prevalence, risk factors, and short-term

outcomes. · Personal protective factors against bullying: emotional, social, and moral competencies. · Contextual protective factors against bullying: school-wide climate. · Protecting children through anti-bullying interventions. · Protecting bullies and victims from long-term undesirable outcomes. · Future directions for research, practice, and policy. With its wealth of answers to a global concern, *Protecting Children against Bullying and Its Consequences* is a definitive reference and idea book for the international community of scholars in criminology and developmental psychology interested in bullying and youth violence, as well as practitioners and policymakers. .
