Sommario/riassunto

This book is dealing with past, current and future change processes in European, Northern American as well as Australian cities and urban regions, and with the challenges they pose to a resilient urban development. Additionally, contributions deal with potential transformations of urban and regional development and related planning and governance approaches. It is referred to three dominant concepts on how it can be dealt with long-term or surprising and also sudden disastrous change, with an overweight on resilience. Contents
Past, current and future change processes and their consequential challenges to urban and regional development
