

1. Record Nr.	UNINA9910254850603321
Titolo	Distributed Computer and Communication Networks : 20th International Conference, DCCN 2017, Moscow, Russia, September 25–29, 2017, Proceedings // edited by Vladimir M. Vishnevskiy, Konstantin E. Samouylov, Dmitry V. Kozyrev
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-66836-6
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XIV, 478 p. 181 illus.)
Collana	Communications in Computer and Information Science, , 1865-0929 ; ; 700
Disciplina	004.36
Soggetti	Computer communication systems Mathematical statistics Computer system failures Computer simulation Computer science—Mathematics Application software Computer Communication Networks Probability and Statistics in Computer Science System Performance and Evaluation Simulation and Modeling Math Applications in Computer Science Information Systems Applications (incl. Internet)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Computer and communication networks architecture optimization -- Control in computer and communication networks -- Performance and QoS/QoE evaluation in wireless networks -- Analytical modeling and simulation of next-generation communications systems -- Queuing theory and reliability theory applications in computer networks -- Wireless 4G/5G networks, cm- and mm-wave radio technologies -- RFID technology and its application in intellectual transportation networks -- Internet of things, wearables, and applications of

distributed information systems -- Probabilistic and statistical models in information systems -- Mathematical modeling of high-tech systems -- Mathematical modeling and control problems -- Distributed and cloud computing systems, big data analytics.

Sommario/riassunto

This book constitutes the refereed proceedings of the 20th International Conference on Distributed and Computer and Communication Networks, DCCN 2017, held in Moscow, Russia, in September 2017. The 39 full papers and the two short papers were carefully reviewed and selected from 176 submissions. The papers cover the following topics: computer and communication networks architecture optimization; control in computer and communication networks; performance and QoS/QoE evaluation in wireless networks; analytical modeling and simulation of next-generation communications systems; queueing theory and reliability theory applications in computer networks; wireless 4G/5G networks, cm- and mm-wave radio technologies; RFID technology and its application in intellectual transportation networks; Internet of Things, wearables, and applications of distributed information systems; probabilistic and statistical models in information systems; mathematical modeling of high-tech systems; mathematical modeling and control problems; distributed and cloud computing systems, big data analytics.
