<b>Note generali</b>	Description based upon print version of record.
<b>Nota di bibliografia</b>	Includes bibliographical references at the end of each chapters.
<b>Nota di contenuto</b>	Preface -- Ecological Crisis, Eco-civilization and Eco-city -- An Evaluation on China's Eco-city Construction -- Environment-Friendly City -- Resource-Saving City -- Green Industry City -- Circular Economy city -- Landscape and Leisure city -- Green Consumption city.
<b>Sommario/riassunto</b>	This book introduces the concept of Eco-civilization, highlights the construction and development of eco-cities in China, and assesses the achievements and shortcomings of China's eco-city construction projects. As both China and Western countries face an impending ecological crisis, responding to that crisis is a common challenge for all human beings. There is an overwhelming consensus among Chinese scholars that in order to successfully address the ecological crisis successfully we must establish an eco-civilization, and one important step toward accomplishing that goal is to plan and construct eco-cities.
