Sommario/riassunto

This comprehensive, evidence-based textbook presents the latest knowledge on bad breath, describing insights from basic research and offering expert guidance on current approaches to diagnosis and treatment. The new edition has been thoroughly updated to take account of recent advances in understanding. The opening chapters examine in detail the origins of bad breath, including from the nose and pharynx. Microbial and biochemical aspects are fully explained, and information is also provided on odor perception. The clinically focused chapters cover all forms of laboratory measurement of breath odors, chairside diagnostic techniques, and the full range of available treatment options. The value of self-administered questionnaires in assessing bad breath is discussed, and attention is paid to the problem in specific population groups and to psychological aspects. Finally, future prospects are reviewed. The authors draw on more than forty years of combined experience in the field, both in the laboratory and as consultants to thousands of patients. The book will be of interest to all dentists as well as ENT specialists and family physicians.

Sommario/riassunto	Financial economics is a fascinating topic where ideas from economics, mathematics and, most recently, psychology are combined to understand financial markets. This book gives a concise introduction into this field and includes for the first time recent results from

behavioral finance that help to understand many puzzles in traditional finance. The book is tailor made for master and PhD students and includes tests and exercises that enable the students to keep track of their progress. Parts of the book can also be used on a bachelor level. Researchers will find it particularly useful as a source for recent results in behavioral finance and decision theory.
