Nota di contenuto	Part I: ICT and the Pursuit of Public Good -- Part II: ICT, Innovation and Organizational Change -- Part III: Interacting in an ICT-Enabled Relational Landscape.
Sommario/riassunto	This book presents a collection of original research papers focusing on emerging issues regarding the role of information and communication technologies in organizations, inter-organizational systems, and society. It adopts an inter-disciplinary approach, allowing for the integration of contributions from various disciplines such as

information systems, organizational studies, marketing, accounting, and social sciences. This book offers valuable insights not only for scholars, but also for practitioners, managers, and policy makers. The book is a compilation of the best research papers – originally double blind, peer-reviewed contributions – presented at the ICTO 2015 conference held in Paris.
