Sommario/riassunto	This book focuses on service economy development, particularly on how an industrial economy evolves into a service economy. The book is organized in three sections: The first theoretically answers the general question "what is the service economy?" The second explains the

mechanism of the service economy's formation and development, revealing the evolution trends and attempts to answer the question "where does the service economy come from?" The third section includes an in-depth analysis of Chinese case studies to answer the key question "how can the service economy development be promoted?" Readers will discover what the service economy is and how it relates to and differs from the industrial economy. More importantly, it will provide policy-makers with suggestions for how to promote service-economy development.
