Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"The Dynamics of Right-Wing Extremism within German Society explores the prevalence of right-wing extremist attitudes in Germany. The book provides a thorough psychosocial and sociological theory of general authoritarian dynamics to explain broader societal attitudes, particularly focusing on right-wing extremists. It provides a uniquely long-term perspective on the different dimensions of right-wing extremism-the affinity for dictatorial forms of government, chauvinist attitudes, the trivialisation or justification of National Socialism, anti-Semitism, xenophobia, and social Darwinism. The first chapter delineates the theoretical framework of authoritarian dynamics, while subsequent chapters provide an in-depth analysis of empirical findings and distinguish authoritarian and democratic typologies. The authors focus on recognition of authoritarian statehood and anti-Semitism; the relationship between religion and right-wing extremism; and support for the radical-right populist party, Alternative fur Deutschland (AFD). The innovative theoretical approach of this book scrutinises the theory of authoritarianism in the contemporary world. This book provides unique empirical data and will be of interest to scholars of German

Nota di contenuto	Preface -- Chapter 1 What is Entrepreneurship? -- Chapter 2 Entrepreneurship as Research Domain -- Chapter 3 This Thing Called "Theory" -- Chapter 4 General Design Issues -- Chapter 5 Sampling and Case Selection Issues -- Chapter 6 Operationalization Issues -- Chapter 7 The Dependent Variable -- Chapter 8 The Entrepreneurship Nexus -- Chapter 9 The Power of Replication -- Chapter 10 A Quick Look at Analysis Method -- Epilogue. .
Sommario/riassunto	In this book, one of the most highly recognized entrepreneurship scholars shares in a personal and readable way his rich experience and ideas on how entrepreneurship can be researched. Entrepreneurship is a phenomenon of tremendous societal importance. It is also an elusive phenomenon, which makes researching it fun, fascinating—and frustrating at times. In this fully updated edition, numerous real

examples accompany the treatment of problems and solutions concerning design, sampling, operationalization and analysis. Researching Entrepreneurship is targeted primarily at research students and academics who are relatively new to research or to entrepreneurship research. This said, basic knowledge of research methods is assumed, and when foundational issues are discussed they are typically approach from a non-standard angle and/or with an eye to illuminate entrepreneurship-specific problems and solutions. This makes large parts of the contents potentially valuable for entrepreneurship scholars at any level of research proficiency. The book is also of interest to sophisticated, non-academic users with a professional interest in collecting and analyzing data from emerging and young ventures, and to those who make use of published entrepreneurship research. For example, analysts in marketing research or consultancy firms, business associations, statistical agencies and other government offices may find this book to be a valuable tool. Moreover, while the examples are derived from entrepreneurship research, the book provides a unique "experienced empirical researcher" (rather than "textbook method expert") treatment of issues that are of equal relevance across the social sciences. This goes for topics like the role of theory; research design; validity assessment; statistical inference, and replication. Entrepreneurship research has developed rapidly in the decade that has passed since the first edition. Therefore, all chapters have been comprehensively updated and many have been extended; sometimes to twice the original length. Two of the original chapters have been excluded to make room for entirely new chapters on "the Dependent Variable" and "The Entrepreneurship Nexus." While retaining a unique, personal tone, the author uses examples and references that build on contributions from a large number of top entrepreneurship researchers.
