		Language Teaching and Learning
		Digital Education and Educational Technology
		Language Education
		Germanic Languages
		Teaching and Teacher Education
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di bibliografia	Includes bibliographical references and indexes.
	Nota di contenuto	Machine generated contents note: 1. Situating blended language program evaluation 2. Essentials of blended language program evaluation: Towards an argument-based approach 3. Micro-level evaluation 4. Meso-level evaluation 5. Macro-level evaluation 6. A micro-level case study in Chile 7. A meso-level case study in the USA 8. A meso-level case study in Vietnam 9. A macro-level case study in Australia 10. Reflecting on blended language program evaluation.
	Sommario/riassunto	With the ever-increasing integration of new technologies in face-to-face instructional settings, approaches to modern language education pose numerous challenges to program evaluation. Blended Language Program Evaluation introduces an argument-based approach to guide

program evaluators and stakeholders through planning, conducting, and appraising evaluation projects that result in useful outcomes leading to program improvement. Written for program evaluators and language professionals alike, the book discusses theoretical underpinnings for the proposed framework and describes the specifics of its effectuation at each of the three program levels: micro, meso, and macro levels. To illustrate the utility, flexibility, and application of the framework for evaluating blended language programs, the book presents four case studies conducted in diverse international contexts.
