1. Record Nr.   UNINA9910255016703321

   Titolo   Future Network Systems and Security : Second International Conference,
                             FNSS 2016, Paris, France, November 23-25, 2016, Proceedings / /
                             edited by Robin Doss, Selwyn Piramuthu, Wei Zhou

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                             2016

   ISBN   3-319-48021-9

   Edizione   [1st ed. 2016.]

   Descrizione fisica   1 online resource (X, 195 p. 81 illus.)

   Collana   Communications in Computer and Information Science, , 1865-0929 ; ;
                             670

   Disciplina   004.6

   Soggetti   Computer communication systems
                             Computer security
                             Application software
                             Computers and civilization
                             Data mining
                             Computer Communication Networks
                             Systems and Data Security
                             Information Systems Applications (incl. Internet)
                             Computers and Society
                             Data Mining and Knowledge Discovery

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Includes index.

   Nota di contenuto   Technology -- Communications -- Systems and security aspects of
                             relevance to future networks.

   Sommario/riassunto   This book constitutes the refereed proceedings of the Second
                             International Conference on Future Network Systems and Security, FNSS
                             2016, held in Paris, France, in November 2016. The 12 full papers and
                             one short paper presented were carefully reviewed and selected from
                             34 submissions. The papers focus on the technology, communications,
                             systems and security aspects of relevance to the network of the future.
