Sommario/riassunto

This book comprehensively investigates the challenges to Myanmar's access to the global market. Myanmar is a late entrant in the global trade and investment scenario after years of isolation. However, it has large untapped potentials for trade and investment in minerals, agro and forest based industries, other labour intensive industries, services like tourism, IT, etc. Different chapters of the book explore the implication of democratic transition of Myanmar, the progress of Myanmar's industry and infrastructure, its international linkages and feasible options for integrating more in regional economic groups and also analyses how far Myanmar could exploit the global value chain. Although a number of reports have discussed sector specific prospects of Myanmar, this book is an authoritative work on these aspects for policy planners, academicians, researchers as well as potential investors.
