Sommario/riassunto	This book is the ninth volume in this series which explores the life of Nobel Price-winning economist F.A. Hayek (1899-1992). Hayek was famous for promoting an Austrian version of classical liberalism: this multi-volume biography examines the evolution of Hayek's life and influence. In this volume, a variety of well-known contributors discuss Hayek's views on the divine right of the market taking democratic and free-market principles into account. Topics range from Hayek's philosophical influences, to the profound change his ideas wrought on the political and economic landscape.
