   Pubbl/distr/stampa Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2017

   ISBN   9789811043437
                      9811043434

   Edizione   [1st ed. 2017.]

   Descrizione fisica 1 online resource (XV, 232 p. 112 illus.)

   Collana   Lecture Notes in Educational Technology, , 2196-4971

   Disciplina   371.33

   Soggetti   Science - Study and teaching
                      Education - Data processing
                      Science Education
                      Computers and Education

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Nota di bibliografia Includes bibliographical references at the end of each chapters.

   Nota di contenuto Part 1: Introducing smart learning and smart City -- Smart City:
                      Evolution of the Concept -- Contexts of Smart Learning Environments
                      -- Concepts and Philosophy of Smart Learning -- Framework of Smart
                      Learning -- Part 2: Smart learning in specific domains -- Smart
                      Learning in Digital Campus -- smart Learning in Smart Classroom --
                      Smart Learning in Corporate Universities -- Industry Promoting Smart
                      Learning -- Part 3: Future Trends-Chinese and International
                      perspectives -- Chinese Perspective (Context) -- International
                      Perspective (Context). <.

   Sommario/riassunto This book introduces readers to the current status of smart learning in
                      China by providing extensive and accurate data from different contexts
                      of smart learning. In particular, it investigates smart learning in smart
                      cities, which extends the concept of smart learning to cover both
                      formal and informal learning, and to support life-long learning. With
                      digital technologies and the Internet becoming increasingly integrated
                      into learning, the demand for smart learning has grown steadily,
                      especially in smart city scenarios. As the need for life-long learning is
                      on the rise, smart learning environments in cities should be equipped
                      to meet people's demands. Smart learning/education is also one of the

key applications of smart cities. Though the book's content mainly focuses on the educational technology field, research in cities and industries is also included. This book offers a valuable resource for graduate students in educational technology, smart learning environment and smart city researchers, cooperative university managers, and all others who are interested in smart learning industries.
