Sommario/riassunto	This book directly addresses the multiplicity and complexity of

narrative research by illustrating a variety of avenues to pursuing and publishing research that falls under the umbrella of narrative work. The chapters are drawn from a wide range of disciplines including education, literary studies, cultural studies, music and clinical studies. Each chapter considers a particular methodological issue or approach, illustrating how it was addressed in the course of the research. Each of the chapters concludes with a set of discussion exercises and a further reading list. The book offers a valuable resource for established researchers seeking to expand their methodological and theoretical repertoire, and for graduate students and researchers new to narrative methods.
