Shadows after Sunset : Imperial Materiality and the Empire's Lost Things / James Symonds.</p>
Sommario/riassunto	<p>"Britain was the industrial and political powerhouse of the nineteenth century--the birthplace of the Industrial Revolution and the center of the largest empire of the time. With its broad imperial reach--and even broader indirect influence--Britain had a major impact on nineteenth-century material culture worldwide. Because British manufactured goods were widespread in British colonies and beyond, a more nuanced understanding of those goods can enhance the archaeological study of the people who used them far beyond Britain's shores. However, until recently archaeologists have given relatively little attention to such goods in Britain itself, thereby missing what is often revealing and useful contextual information for historical archaeologists working in countries where British goods were consumed while also leaving significant portions of Britain's own archaeological record poorly understood. The Importance of British Material Culture to Historical Archaeologies of the Nineteenth Century helps fill these gaps, through case studies demonstrating the importance and meaning of mass-produced material culture in Britain from the birth of the Industrial Revolution (mid-1700s) to early World War II. By examining many disparate items--such as ceramics made for export, various goods related to food culture, Scottish land documents, and artifacts of death--these studies enrich both an understanding of Britain itself and the many places it influenced during the height of its international power"--</p> <p>"Case studies of the importance and meaning of mass-produced material culture in Britain during the Industrial Revolution"--</p>

3. Record Nr.	UNINA9910255136603321
Titolo	Future Learning in Primary Schools : A Singapore Perspective / / edited by Ching Sing Chai, Cher Ping Lim, Chun Ming Tan

Chapter 13 Successfully addressing the 11 barriers to school change: A case study from Nan Chiau Primary School, Singapore.

Sommario/riassunto

This edited book tells the story of the multifaceted efforts devoted by a “future school” in Singapore—The Nan Chiau Primary School—in shaping future learning. It documents the various measures implemented by one primary school to improve student learning outcomes in a technology-rich teaching and learning environment. With the current interest in Singapore’s “Masterplan for ICT (information and communication technology) in Education,” and the increasing focus on teaching and learning design by leading education researchers and professionals, this well-timed book will appeal to policy makers, educators and researchers.
