Sommario/riassunto

"Offering a range of perspectives on internationalization in higher education from a globally dispersed group of authors, this book reflects the many facets of the theme. It reminds us that, while internationalization is strongly connected to the globalization of society, at the same time it is deeply embedded in local political, economic and social structures, systems and cultures. The increasing attention given to internationalization by institutions all around the world is leading to diversification and broadening of practice. This in turn deepens our understanding of what is needed to enhance the educational experiences of students, and how the outcomes of internationalization contribute to the skills needed in a globalized and multicultural society. Yet inevitably the impact is becoming more noticeable locally and the six sections of the book focus on these dimensions: • Internationalization in Local and Global Contexts • Local and Global Drivers for Change • Global and Local Dimensions of Curriculum Internationalization • The Outcomes of Local and Global International Education • Internationalization for Local and Global Employability • Regional and National Cases of Local and Global Internationalization How can we define more precise learning outcomes that underpin learning and teaching? How do we avoid the societal risks of internationalization and ensure that internationalization opportunities and benefits are shared equally? How do we prevent brain drain and commercialization? What are the values that underlie our actions? These are just some of the questions that will occupy our minds, locally and globally, in the years to come and which this book seeks to highlight." .
