Sommario/riassunto

This book advances a broad constellation of critical concepts situated within the field of queer studies and education. Collectively, the concepts take up a cross-section of scholarship that speaks to various political, epistemological, theoretical, methodological, and pedagogical concerns. Given the ongoing global centrality of sociocultural and political developments related to the topic of LGBTQ in the twenty-first century, the concepts in this volume and the issues raised by each contributor will have wide international appeal among researchers, scholars, educators, students, and activists working at the intersection of queer studies and education.
