G. Post -- A Resilient EU Facing Global Environmental Risks by Leonardo Massai.

Sommario/riassunto

This book takes a completely new and innovative approach to analysing the development of EU law. Within the framework of different important areas of EU law, such as the internal market, consumer protection law, social law, investment law, environment law, migration law, legal translation and terminology, it examines the Union's approach to the regulation and management of legal risks. Over the years, the Union has come to a point where it is becoming increasingly difficult to justify its authority to regulate in various areas of law. In managing legal risks deriving from the diversity of Member States' laws, which create barriers to trade and hinder the Union's economy, the Union itself has actually produced new legal risks that now have to be addressed. This failure on the part of EU institutions to manage legal risks has contributed to legal uncertainty for actors operating on the internal market. This book intends to contribute to the Union's smoother functioning and continuing development by proposing effective concrete solutions for managing the legal risks distorting the development of various areas of EU law. It pursues an innovative and effective approach to identify legal risks, their causes at the EU level and their impacts on the functioning of the Union and its Member States. By presenting new approaches in this context, the first book on legal risk management in the EU will actively promote the improvement of the EU lawmaking process and the application of EU law in practice.
