Sommarioriassunto	In privat-staatlichen Regelungsstrukturen verfügt jede Seite über Mitentscheidungs- oder zumindest Konsultativbefugnisse. Es sind oft Kombinationen von rein privatrechtlichen Beziehungen und öffentlich-rechtlichen Befehlsstrukturen. Heute unter Schlagworten wie "Governance" oder "regulierte Selbstregulierung" intensiv diskutiert, reichen sie aber bis ins 19. Jahrhundert zurück. Der Band stellt sie vor und eröffnet weitere Forschungsperspektiven. In private-public regulatory structures, decisions are made collectively, with each side possessing consultative rights at the very minimum. Such structures are often amalgams of purely private law relationships and public law administrative bodies. Discussed today in terms of

“governance” and “regulated self-regulation,” their origins go back to the 19th century. This volume presents their history and opens further research perspectives.

Sommario/riassunto	This book defies the reigning dismissal of the philosophy of nature by turning to what Aristotle, Kant, and Hegel have had to say about nature and critically thinking through their arguments so as to reconstruct a comprehensive account of the universe. Aided by the contributions of

more recent thinkers, such as Albert Einstein, Werner Heisenberg, Michael B. Foster, and Hans Jonas, *Conceiving Nature* shows how the mechanics of matter in motion, the physics of electromagnetism, and chemical process provide all that is needed for life to emerge and give rise to rational animals capable of knowing nature in truth. The work contains detailed discussions of much of Aristotle's writing on nature, of Kant's *Metaphysical Foundations of Natural Science*, and of Hegel's *Philosophy of Nature*.
