Sommario/riassunto	This book analyses the processes and factors that contributed to the emergence and eventual consolidation of the Greek Cypriot Right in the

era of British colonialism. It seeks to understand political developments in Cyprus in the period extending from 1900 to 1955 with regard to their social, ideological and economic determinants. By examining changing forms of political life, a general reconstitution of the political sphere and a specific set of changes in the ideology and organisation of the Greek Cypriots, the author offers a framework for analysing Greek Cypriot right-wing party politics, identifying its sources of mobilisation and main actors such as the Church of Cyprus, and understanding its subsequent transformations.
