Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Introduction -- Integration, Polarization, and Segregation in the Global City -- Methods -- The Global City Cases -- Conclusions.
Sommario/riassunto	This book examines how the severe economic downturn following the 2007-2008 financial crisis affected the structural integration and quality of life of urban migrants in Europe and North America. It compares the experiences of migrants from Poland, Romania, Serbia, Pakistan, and Ghana in five similar, secondary global cities of Hamburg (Germany), Barcelona (Spain), Chicago (USA), Toronto (Ontario, Canada), and Montréal (Québec, Canada) over the period of 2000-2015. The work uses statistical analysis to gauge changes in residential segregation and structural integration (such as unemployment, poverty, and social assistance rates). It then provides qualitative analyses of individual city neighborhoods where the target migrant groups have settled, exploring each community's unique evolution and the ambivalent impact that local policy responses have had on their quality of life. With this study, researchers, instructors, students, and policymakers with an interest in migration, urban development, and global cities will be far more knowledgeable of both the potential and

limits of policy efforts. .
