Titolo	Essentials of polymer flooding technique / / Antoine Thomas
Pubbl/distr/stampa	Hoboken, NJ : , : Wiley, , 2019
ISBN	1-119-53762-2 1-5231-2813-5 1-119-53763-0 1-119-53761-4
Edizione	[First edition.]
Descrizione fisica	1 online resource (330 pages)
Collana	THEi Wiley ebooks
Disciplina	622/.3381
Soggetti	Polymer flooding (Petroleum engineering)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	<p>Provides an easy-to-read introduction to the area of polymer flooding to improve oil production. The production and utilization of oil has transformed our world. However, dwindling reserves are forcing industry to manage resources more efficiently, while searching for alternative fuel sources that are sustainable and environmentally friendly. Polymer flooding is an enhanced oil recovery technique that improves sweep, reduces water production, and improves recovery in geological reservoirs. This book summarizes the key factors associated with polymers and polymer flooding—from the selection of the type of polymer through characterization techniques, to field design and implementation—and discusses the main issues to consider when deploying this technology to improve oil recovery from mature reservoirs. Essentials of Polymer Flooding Technique introduces the area of polymer flooding at a basic level for those new to petroleum production. It describes how polymers are used to improve efficiency of “chemical” floods (involving surfactants and alkaline solutions). The book also offers a concise view of several key polymer-flooding topics that can’t be found elsewhere. These are in the areas of pilot project design, field project engineering (water quality, oxygen removal, polymer dissolution equipment, filtration, pumps and other</p>

equipment), produced water treatment, economics, and some of the important field case histories that appear in the last section. Provides an easy to read introduction to polymer flooding to improve oil production whilst presenting the underlying mechanisms Employs “In A Nutshell” key point summaries at the end of each chapter Includes important field case studies to aid researchers in addressing time- and financial-consumption in dealing with this issue Discusses field engineering strategies appropriate for professionals working in field operation projects Essentials of Polymer Flooding Technique is an enlightening book that will be of great interest to petroleum engineers, reservoir engineers, geoscientists, managers in petroleum industry, students in the petroleum industry, and researchers in chemical enhanced oil recovery methods.

Nota di contenuto	Historical overview of the universality of diplomatic practice -- Sources of Islamic and international diplomatic laws : between tension and compatibility -- A general overview of diplomatic immunity in international diplomatic law and Islamic law -- Diplomatic immunities in Muslim states : Islamic law perspective of Muslim state practice -- Terrorist attacks on diplomatic institutions : jihad and Islamic law viewpoints.
Sommario/riassunto	The book explores the compatibility of Islamic law and international diplomatic law, aiming to maximize diplomatic protection in Muslim states by invoking Islamic law in support of international diplomatic law at national level. The author investigates the concept of diplomatic immunities and privileges under Islamic law and modern international law in theory and practice. The core of the book engages theoretical analyses of the two legal systems with a view to ascertaining the presence of any compatibility or tension in their respective principles on diplomatic law and then, examines the practices of some Muslim states within the context of that theoretical analysis. Ismail proposes that two legal systems are compatible and can be harmonized to enhance the concept of diplomatic immunities and privileges in Muslim states. The book facilitates a better understanding of the relationship that exists between Islamic diplomatic law and international diplomatic law with the hope to ultimately maximize diplomatic protection by clarifying and developing Islamic diplomatic law, which may eventually complement international diplomatic law.
