The Environmental Legacy of Alexander Hamilton - Manufacturing Power from Delusion -- 7. The

Environmental Legacy of James Madison - Pursuing Stability in a World of Limits -- 8. The Constitution After 100 Years - Environmental Theory in the Gilded Age -- 9. Living With the Legacies - Our Culture Confronts Our Environment.

Sommario/riassunto

This powerful book focuses on the capacity of the American political system to respond to ecological challenges through policy perspectives, the constraints of our written Constitution, and the determination we must address these tests of national character. Put simply, this is a book about politics, policy, and political will. Kalinowski brilliantly shows that America's collective will is found in the cultural values enunciated by the Founding Fathers and passed down through history with modifications. It comprises the essential missing ingredient in determining how we currently respond to crises. Thomas Jefferson, Alexander Hamilton, and James Madison had distinct ideas concerning the role that Nature might play in the future. Recognizing the origins and impacts of their environmental legacies is the key to interpreting where American environmental politics is today, how we got here, and where we might be headed.
