transplantation – Fecteau -- 3.2 Vascularized Composite Allotransplantation (VCA) - Zlotnik Shaul, Wright, Flynn, Borschel, Hanson, and Zuker -- 3.3 Media management – Amaral and Feudtner -- 4.0 Allocating Organs -- 4.1 Transplantation for pediatric foreign nationals - Fortin and Greenberg -- 4.2 Neurodevelopmental status as a criterion for solid organ transplant eligibility – Wightman, Diekema and Smith -- 5.0 Recipient Issues -- 5.1 Psychosocial aspects of pediatric organ transplantation – Derrington, Goldberg and Frader -- 5.2 Ethical issues in adolescents and transplantation – Goldberg and Fine -- Conclusion - Rodríguez-Arias, Greenberg, Goldberg.

Sommario/riassunto

This book offers a theoretical and practical overview of the specific ethical and legal issues in pediatric organ transplantation. Written by a team of leading experts, *Ethical Issues in Pediatric Organ Transplantation* addresses those difficult ethical questions concerning clinical, organizational, legal and policy issues including donor, recipient and allocation issues. Challenging topics, including children as donors, donation after cardiac death, misattributed paternity, familial conflicts of interest, developmental disability as a listing criteria, small bowel transplant, and considerations in navigating the media are discussed. It serves as a fundamental handbook and resource for pediatricians, transplant health care professionals, trainees, graduate students, scholars, practitioners of bioethics and health policy makers.
