- 3 Out-of-Body and Near-Death Experiences
 - 3.1 The empirical approach to survival
 - ; 3.1.1 Philosophical and religious grounds for belief in survival
 - ; 3.1.2 Characterizing the empirical approach to survival
 - ; 3.1.3 Empirical data that might confirm survival
 - ; 3.2 Out-of-body experiences
 - 3.2.1 The relevance of OBEs to survival

Sommario/riassunto

Sudduth provides a critical exploration of classical empirical arguments for survival arguments that purport to show that data collected from ostensibly paranormal phenomena constitute good evidence for the survival of the self after death. Utilizing the conceptual tools of formal epistemology, he argues that classical arguments are unsuccessful.
