| | Sommario/riassunto | This standard applies to low-voltage gas discharge tube (GDT) surge-protective components for application on systems with voltages less than or equal to 1000 V rms or 1500 V dc. These protective |

components are designed to limit voltage surges on balanced or unbalanced communication circuits and on power circuits operating from dc to 420 Hz. This standard contains a series of standard test criteria for determining the electrical characteristics and ratings of gas discharge tube surge-protective components.

Nota di bibliografia	Includes bibliographical references (pages 201-216) and index.
Nota di contenuto	Ottoman criminal justice and the transformation of Islamic criminal law and punishment in the age of modernity, 1839-1922 -- Prison reform in the late Ottoman Empire : the state's perspectives -- Counting the incarcerated : knowledge, power and the prison population -- The spatialisation of incarceration : reforms, response and the reality of prison life -- Disciplining the disciplinarians : combating corruption and abuse through the professionalisation of the prison cadre -- Creating juvenile delinquents : redefining childhood in the late Ottoman Empire.
Sommario/riassunto	The Western world stereotypically associates Ottoman or 'Turkish' prisons with images of torture, narcotics and brutal sexual behaviour. Now, Kent F. Schull argues that these prisons were actually a site of immense reform and contestation during the 19th century. It was

within these prisons' walls that many of the pressing questions of Ottoman modernity were worked out; questions of administrative centralisation, Islamic criminal law and punishment, gender and childhood, prisoner rehabilitation, bureaucracy, identity and social engineering. By juxtaposing them with the reality of prison life, Schull investigates how state-mandated reforms affected the lives of local prison officials and inmates. He shows how these individuals actively conformed to, contested and manipulated new penal policies and practices for their own benefit.
