Note generali	Title from publisher's bibliographic system (viewed on 07 Feb 2020).
Nota di contenuto	Cover -- Half-title page -- Reviews -- Title page -- Copyright page -- Dedication -- Contents -- List of Figures -- Acknowledgments -- Chapter 1 The Role of Myths in Our Climate-Energy Challenge -- Chapter 2 The Art of Deluding Ourselves and Others -- Chapter 3 Climate Scientists Are Conspirators -- Chapter 4 All Countries Will Agree on Climate Fairness -- Chapter 5 This Fossil Fuel Project Is Essential -- Chapter 6 We Must Price Carbon Emissions -- Chapter 7 Peak Oil Will Get Us First Anyway -- Chapter 8 We Must Change Our Behavior -- Chapter 9 We Can Be Carbon Neutral -- Chapter 10 Energy Efficiency Is Profitable -- Chapter 11 Renewables Have Won -- Chapter 12 We Must Abolish Capitalism -- Chapter 13 The Simple Path to Success with Our Climate-Energy Challenge -- Notes -- Bibliography -- Index.
Sommario/riassunto	Sometimes solving climate change seems impossibly complex, and it is hard to know what changes we all can and should make to help. This book offers hope. Drawing on the latest research, Mark Jaccard shows

us how to recognize the absolutely essential actions (decarbonizing electricity and transport) and policies (regulations that phase out coal plants and gasoline vehicles, carbon tariffs). Rather than feeling paralyzed and pursuing ineffective efforts, we can all make a few key changes in our lifestyles to reduce emissions, to contribute to the urgently needed affordable energy transition in developed and developing countries. More importantly, Jaccard shows how to distinguish climate-sincere from insincere politicians and increase the chance of electing and sustaining these leaders in power. In combining the personal and the political, *The Citizen's Guide to Climate Success* offers a clear and simple strategic path to solving the greatest problem of our times. A PDF version of this title is also available as Open Access on Cambridge Core at doi.org/10.1017/9781108783453.

Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	<p>This volume presents an academic proposal, developed by a joint research group of leading scholars in the social and natural sciences from universities affected by global-scale mega disasters occurring in Asia in recent decades. These include Kobe University, which experienced the 1995 Hanshin-Awaji Earthquake; Tohoku University and Iwate University, both at the center of post-disaster reconstruction following the 2011 East Japan Earthquake and Tsunami; Syiah Kuala University in Aceh, Indonesia, which was hard-hit by the 2004 Indian Ocean Tsunami; and Sichuan University, which took a leading role in post-disaster recovery following the 2004 Sichuan Earthquake.</p> <p>Presenting a comparative analysis focused on lessons learned from the recovery phase following the East Japan Earthquake and Tsunami, the book addresses in detail the questions of what should be done to enable truly community-based town planning, and what roles should be played by universities in order to achieve those goals.</p>
