	Disciplina	320.52082/0973
	Soggetti	Women - Political activity - United States Conservatism - United States Feminism - United States Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references (p. [155]-167) and index.
	Nota di contenuto	Contents; Acknowledgments; ONE: Introduction; TWO: Conservative Women's Political Activism; THREE: Playing "Femball": CWA and IWF as Women's Organizations; FOUR: Are Women Victims? Framing Violence against Women; FIVE: Finding Common Ground: Constructing Mothers' Interests; SIX: Representing Women's Health Interests; SEVEN: The Political Implications of Conservative Women's Activism; Appendix A; Appendix B; Notes; Bibliography; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W; Y
	Sommario/riassunto	When we think of women's activism in America, figures such as Gloria Steinem and Betty Friedan invariably come to mind--those liberal doyennes who have fought for years to chip away at patriarchy and achieve gender equality. But women's interests are not synonymous with organizations like NOW anymore. As Ronnee Schreiber shows, the conservative ascendancy that began in the Reagan era has been accompanied by the emergence of a broad-based conservative women's movement. And while firebrands like Ann Coulter and Phyllis Schlafly may be the public face of rightwing women's activism, a

	Note generali	Refereed/Peer-reviewed Title from content provider. "Big Data and Cognitive Computing (ISSN 2504-2289) is an international, scientific, peer-reviewed, open access journal of big data and cognitive computing published quarterly online by MDPI."
	Sommario/riassunto	"In the past decade, the computer and information industry has experienced rapid changes in both platform scale and scope of applications. Computers, smart phones, clouds, social networks, and supercomputers demand not only high performance but also a high degree of machine intelligence. As a matter of fact, we are entering an era of big data and cognitive computing. In the big data era, successful cloud systems, web services and supercomputer centers must be designed to discover, store, process, learn, analyze, and predict from a massive amount of data. To face these new computing and communication changes, we must upgrade the clouds and the computing ecosystem with new capabilities, such as machine learning,

IoT sensing, data analytics, and cognitive machines mimicking human intelligence. This journal blends together big-data theories with emerging technologies on smart clouds and exploring supercomputers with new applications"--About page, viewed August 8, 2019.
