

1. Record Nr.	UNINA9910257389203321
Titolo	Computing Methods in Applied Sciences [[electronic resource]] : Second International Symposium, December 15-19, 1975 / / edited by R. Glowinski, J. L. Lions
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1976
ISBN	3-540-37550-3
Edizione	[1st ed. 1976.]
Descrizione fisica	1 online resource (VIII, 593 p.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 58
Disciplina	530
Soggetti	Physics Physics, general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	A simple theory of geometrical stiffness with applications to beam and shell problems -- Modeles numeriques en mecanique des milieux continus -- Infinite elements in the study of fluid-structure interaction problems -- Galerkin approximations of a class of nonlinear boundary-value problems and evolution problems in elasticity -- Sur l' approximation numerique des problemes a frontiere libre lies a la filtration dans les materiaux poreux -- Interior Penalty Procedures for Elliptic and Parabolic Galerkin Methods -- Analyse numerique de problemes tridimensionnels en magnetostatique -- Some aspects of a mixed finite element method applied to fourth order partial differential equations -- Spectral methods applied to the integration of meteorological equations -- Etude numerique des proprietes ergodiques d'un systems construit sur les equations D'Euler d'un fluids parfait bidimensionnel -- General circulation models with examples taken from the meteorological office model -- Modelisation des flux turbulents dans une couche convective -- Prevision meteorologique par un modele d'ecoulement a maille fine -- Mathematical and physical characteristics and recent results of ocean tide models -- On formulating an non-linear numerical model in three dimensions for tides and storm surges -- Une methode d'identification pour determiner des parametres oceanographiques -- Utilisation des modeles

mathemtiques pour l'étude de la refrigeration des centrales electriques
installées en bord de mer -- Mathematical hydrodynamic models for
the study of marine circulation and dispersion of pollutants in a shallow
sea -- Some numerical methods in statistical hydrodynamics --
Determination numérique de la configuration d'équilibre du plasma
dans un tokomak -- Stabilité de la discréétisation des équations de l'
hydrodynamique lagrangienne 2D -- Finite difference methods for
ordinary boundary value problems -- Numerical methods for singular
perturbation problems -- On the numerical solution of linear mixed
problems -- Application of implicit difference schemes to the solution
of aerodynamic problems.
