

1. Record Nr.	UNINA9910257396103321
Titolo	Broken Symmetries [[electronic resource] ] : Proceedings of the 37. Internationale Universitätswochen für Kern- und Teilchenphysik, Schladming, Austria, February 28–March 7, 1998 // edited by Leopold Mathelitsch, Willibald Plessas
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1999
ISBN	3-540-49130-9
Edizione	[1st ed. 1999.]
Descrizione fisica	1 online resource (VII, 304 p. 10 illus.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 521
Disciplina	539.7/25
Soggetti	Mathematical physics Nuclear physics Theoretical, Mathematical and Computational Physics Particle and Nuclear Physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Discrete and global symmetries in particle physics -- CP violation -- CP violation: Experimental status and prospects -- Spontaneously broken symmetries -- Chiral symmetry -- Quark mass hierarchies, flavor mixing and maximal CP-violation -- Duality in quantum field theory (and string theory) -- Supersymmetry, strings and unification -- Abstracts of the seminars.
Sommario/riassunto	Symmetries and the breaking of symmetries play an important role in particle physics. Several experts in the field give overviews of different symmetry aspects in subatomic physics. Topics like CP violation, chiral symmetry, supersymmetry and spontaneous symmetry breaking are addressed. The articles are the written accounts of lectures given at the 1998 Schladming Winter School and address in particular graduate students. The material is dealt with in a comprehensive and detailed manner and is at the same time pedagogically well devised.
