1. Record Nr.   UNINA9910257409403321

   Titolo   Padé Approximants Method and Its Applications to Mechanics
                                 [[electronic resource] /] / edited by H. Cabannes

   Pubbl/distr/stampa   Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                                 , 1976

   ISBN   3-540-38132-5

   Edizione   [1st ed. 1976.]

   Descrizione fisica   1 online resource (XV, 270 p.)

   Collana   Lecture Notes in Physics, , 0075-8450 ; ; 47

   Disciplina   620

   Soggetti   Engineering
                                 Engineering, general

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di contenuto   The linear, functional equation approach to the problem of the
                                 convergence of Padé approximants -- Construction of variational
                                 bounds for the N-body eigenstate problem by the method of Pade
                                 approximations -- Rational polynomial approximants in N variables --
                                 Convergence of rows of the Pade table -- The use of Pade
                                 approximation in numerical integration -- Determination of shock
                                 waves by convergence acceleration -- Cyclic iterative method applied
                                 to transonic flow analyses -- A technique for accelerating iterative
                                 convergence in numerical integration, with application in transonic
                                 aerodynamics -- The rise of a bubble in a fluid -- Rational
                                 approximations to the solution of the blunt-body & related problems
                                 -- Wave front expansions and Pade' approximants for transient waves
                                 in linear dispersive media -- Application of methods for acceleration of
                                 convergence to the calculation of singularities of transonic flows -- The
                                 use of Pade fractions in the calculation of nozzle flows -- A
                                 bibliography on Pade approximation and some related matters.
