

1. Record Nr.	UNINA9910260642603321
Autore	Felleisen Matthias
Titolo	A little Java, a few patterns / / Matthias Felleisen, Daniel P. Friedman ; drawings by Duane Bibby ; foreword by Ralph E. Johnson
Pubbl/distr/stampa	Cambridge, Massachusetts : , : MIT Press, , c1998 [Piscataqay, New Jersey] : , : IEEE Xplore, , [1997]
ISBN	0-585-03790-6
Descrizione fisica	1 PDF (xiv, 179 pages) : illustrations
Altri autori (Persone)	FriedmanDaniel P
Disciplina	005.133
Soggetti	Java (Computer program language)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Java is a new object-oriented programming language that was developed by Sun Microsystems for programming the Internet and intelligent appliances. In a very short time it has become one of the most widely used programming languages for education as well as commercial applications. Design patterns, which have moved object-oriented programming to a new level, provide programmers with a language to communicate with others about their designs. As a result, programs become more readable, more reusable, and more easily extensible. In this book, Matthias Felleisen and Daniel Friedman use a small subset of Java to introduce pattern-directed program design. With their usual clarity and flair, they gently guide readers through the fundamentals of object-oriented programming and pattern-based design. Readers new to programming, as well as those with some background, will enjoy their learning experience as they work their way through Felleisen and Friedman's dialogue.
