

1. Record Nr.	UNINA9910260651903321
Autore	De Jong Kenneth A.
Titolo	Evolutionary computation : a unified approach / / Kenneth A. De Jong
Pubbl/distr/stampa	Cambridge, Massachusetts : , : MIT Press, , 2006 [Piscataway, New Jersey] : , : IEEE Xplore, , [2006]
ISBN	1-282-09624-9 0-262-25598-7 9786612096242 1-4237-7455-8
Descrizione fisica	1 online resource (267 p.)
Classificazione	54.51
Disciplina	005.1
Soggetti	Evolutionary programming (Computer science) Evolutionary computation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [241]-252).
Nota di contenuto	1. Introduction -- 2. A historical perspective -- 3. Canonical evolutionary algorithms -- 4. A unified view of simple EAs -- 5. Evolutionary algorithms as problem solvers --
Sommario/riassunto	Evolutionary computation, the use of evolutionary systems as computational processes for solving complex problems, is a tool used by computer scientists and engineers who want to harness the power of evolution to build useful new artifacts, by biologists interested in developing and testing better models of natural evolutionary systems, and by artificial life scientists for designing and implementing new artificial evolutionary worlds. In this clear and comprehensive introduction to the field, Kenneth De Jong presents an integrated view of the state of the art in evolutionary computation. Although other books have described such particular areas of the field as genetic algorithms, genetic programming, evolution strategies, and evolutionary programming, Evolutionary Computation is noteworthy for considering these systems as specific instances of a more general class of evolutionary algorithms. This useful overview of a fragmented field is suitable for classroom use or as a reference for computer scientists and engineers.
