

1. Record Nr.	UNINA9910260652603321
Autore	Kaptelinin Victor
Titolo	Acting with technology : activity theory and interaction design // Victor Kaptelinin and Bonnie A. Nardi
Pubbl/distr/stampa	Cambridge, Massachusetts : , : MIT Press, , c2006 [Piscataway, New Jersey] : , : IEEE Xplore, , [2009]
ISBN	9786612096495 0-262-25647-9 1-282-09649-4 1-4294-1874-5
Descrizione fisica	333 p. : ill
Collana	Acting with technology
Altri autori (Persone)	NardiBonnie A
Disciplina	004.01/9
Soggetti	Human-computer interaction Design - Human factors User interfaces (Computer systems) Action theory Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen.
Nota di bibliografia	Includes bibliographical references (p. [293]-324) and index.
Sommario/riassunto	Activity theory holds that the human mind is the product of our interaction with people and artifacts in the context of everyday activity. Acting with Technology makes the case for activity theory as a basis for understanding our relationship with technology. Victor Kaptelinin and Bonnie Nardi describe activity theory's principles, history, relationship to other theoretical approaches, and application to the analysis and design of technologies. The book provides the first systematic entry-level introduction to the major principles of activity theory. It describes the accumulating body of work in interaction design informed by activity theory, drawing on work from an international community of scholars and designers. Kaptelinin and Nardi examine the notion of the object of activity, describe its use in an empirical study, and discuss key debates in the development of activity theory. Finally, they outline

current and future issues in activity theory, providing a comparative analysis of the theory and its leading theoretical competitors within interaction design: distributed cognition, actor-network theory, and phenomenologically inspired approaches.
