

1. Record Nr.	UNISA990003128110203316
Autore	ABRAMOVIC, Marina
Titolo	Marina Abramovic : artist body / with texts by Velimir Abramovic... [et al.] : performances 1969-1998
Pubbl/distr/stampa	Milano : Charta, copyr. 1998
ISBN	88-8158-175-2
Descrizione fisica	475 p. : ill. ; 30 cm
Disciplina	709.497
Soggetti	Abramovic, Marina
Collocazione	V F ABR 1
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Pubbl. in occasione della mostra itinerante tenuta nel 1998 con il tit.: Abramovic, artist body-public body

2. Record Nr.	UNINA9910261144803321
Autore	Kringelbach Morten L
Titolo	At Risk for Neuropsychiatric Disorders: An Affective Neuroscience Approach to Understanding the Spectrum
Pubbl/distr/stampa	Frontiers Media SA, 2016
Descrizione fisica	1 online resource (260 p.)
Collana	Frontiers Research Topics
Soggetti	Neurosciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Neuropsychiatric disorders such as schizophrenia, bipolar disorder, depression, anxiety disorders, and other mental disorders constitute about 13% of the global burden of disease surpassing both cardiovascular disease and cancer. The total cost worldwide of these diseases is estimated to exceed 100 million disability-adjusted life years. In order to begin to address this important problem, the present Research Topic brings together a group of leading affective neuroscience researchers to present their state-of-the-art findings using an affective neuroscience approach to investigate the spectrum of neuropsychiatric disorders from patients to those at risk. They focus on different aspects of the emotional and social cognitive disturbances which are core features of neuropsychiatric disorders. While progress has been slow over last couple of decades, we are finally beginning to glimpse some of the underlying neural mechanisms of the emotional and social cognitive disturbances in patients and those at risk. With the technological advances in affective neuroscience and neuroimaging presented in this volume, we hope that progress will be much swifter in the coming years such that we can provide better care for patients and those at risk.</p>
