

1. Record Nr.	UNINA9910265943003321
Autore	Fringuelli Francesco
Titolo	The Diels-Alder reaction : selected practical methods
Pubbl/distr/stampa	New York : , : Wiley, , 2003 ©2004
ISBN	9786610554591 0-470-84581-3 1-280-55459-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (350 pages)
Altri autori (Persone)	Taticchi Aldo
Disciplina	547.2
Soggetti	Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This is the first book to collect together 70 years worth of experimental procedures that have been developed to perform the Diels-Alder reaction. It begins with the fundamental principles and contains numerous graphical abstracts to present the basic concepts in a concise and pictorial way. Covering the theory and synthetic applications of the experimental methods it describes the procedures and techniques and includes reports on industrial applications.* Illustrates the fundamental principles and summarises experimental methods used to carry out the Diels-Alder reaction* Contains physical and catalytic methods to enhance the selectivity of the Diels-Alder reaction* Includes procedures for cycloaddition accomplished in conventional and unconventional media* Outlines the practical procedures* Focuses on clean syntheses and green chemistry* Provides a single source for relevant information and includes over 1,000 references</p> <p>The Diels-Alder reaction mechanism was first published in 1928 and in the last 70 years has become the most commonly used and studied mechanism in organic chemistry.</p>
